

AUTOMATIC THREAD TENSION: Most of sewing can be done with thread tension set at "AUTO" position.

STITCH WIDTH CONTROL: The width of all stitches can be made narrower or wider by adjusting the stitch width control. Straight stitchings at left and center positions can be selected by the same control.

ELECTRONIC NEEDLE CONTROL: The machine is electronically controlled to stop with the needle in the up position whenever you stop sewing. When you want to lower or raise the needle, push the needle up/down switch.
